## Summary

A certified full-stack web-developer, graduated from the University of Kansas Coding Boot-Camp. Confident in HTML, Bootstrap, and jQuery. Enjoys contributing to meaningful projects in the work-place.

## Technical Skills

**Languages:** HTML, CSS, Javascript

**Frameworks:** Bootstrap, jQuery

## Projects

### Exploration Food

Github: <https://github.com/JoePall/Exploration-Food>

Deployed: <https://joepall.github.io/Exploration-Food/>

Selective recipe application designed to match the needs of all diets and food restrictions. Great for those with allergies, religious restrictions, or are simply particular about their food. Will present users with an exciting new Recipe generated based on their personalized profile!

### Weather App

Github: <https://github.com/AnthonyStematz-Breitling/WeatherApp>

Deployed: <https://anthonystematz-breitling.github.io/WeatherApp/>

Using a weather API the application presents the current weather in the chosen city and forecast for the next five days. Then those searched cities are presented as a search history for easy user access in the future.

### Coding Quiz

Github: <https://github.com/AnthonyStematz-Breitling/CodingQuiz>

Deployed: <https://anthonystematz-breitling.github.io/CodingQuiz/>

A short timed quiz. When a question is answered the user is shown a new question, and when answered incorrectly time is subtracted from the timer. The user can save their initials along with their score after the quiz.
