Summary

A Full-Stack Web-Developer, ready to put the pedal-to-the-metal in an Agile work environment. Detail oriented, values efficiency and clear communication. Confident in React, Node, Javascript, CSS, HTML, SQL. Has worked with 3rd party API's, ORMs, PWAs, and MongoDB/Mongoose. Loves to learn and will do so quickly!

Technical Skills

Languages: Javascript, CSS, HTML, MongoDB, Git, SQL, Sequelize, Jest
Frameworks: React, Node, Express, jQuery, Bootstrap

Projects

Tracking Employees | GH | **Command-Line Application**
Tech Used: Javascript, Node, Inquirer, Node-Util, SQL

- This command line application fulfills all CRUD operations by allowing the user to create and delete employees, roles, and departments; As well as view employees by department, role, or manager and update said role.
- Used async await promise functionality to map all current rows from a table before the user is presented with the inquirer prompt.
- Successfully used foriegn keys and inner join to associate employees with their designated department.

Grace Fabrics | GH | **Full-Stack**
Tech Used: React, Express, Node, SQL, Sequelize, MaterialUI, Axios, Passport, Bcrypt, EmailJS, Local-Storage

- For this project we partnered with a local business to provide them with a shop where the admin can create, delete, and update products in the online shop.
- Refactored React client and MVC for efficiency / DRY (Don't Repeat Yourself) methodology
- Used Local-Storage to save users cart items in the browser

Cocktail_Coterie | GH | **Front-End**
Tech Used: Node, Express, Handlebars, NodeFS, SQL, Sequelize, jQuery, Bootstrap, Axios, Passport, Bcrypt

- This app allows the user to organize an online cocktail party and send their friends an invite containing the cocktail ingredient list, and personal zoom link.
- Used Handlebars, HTML, CSS and Bootstrap to create multiple views of a clean and stylized webpage.
- Used NodeFS to take user inputs and create a new html page, with an original url, to be used as an invitation link.

Experience

Teaching Assistant   2021-Current
Trilogy Education   Remote
- Assured student understanding by positively presenting information and directions in a clear and precise manner.
- Supplied support for class by noting struggle areas during class and reviewing during weekend office hours
- Increased my knowledge base on the newest technologies by learning the continuously updated curriculum
- Gave guidance during debugging by sharing my expertise in what to look for in error messages, where to look for the cause of different errors, and where to console.log when errors messages are not present to find the problem.

Front-End Web Developer   Oct 2020-March 2021
Cerbanimo   Remote
- Utilized State and useEffect inside React to manage data from user inputs throughout application
- Accurately depicted a complex data-structure including users, communities, and projects on the front-end
- Quickly and efficiently built several components utilizing Bootstrap
- Assured accessibility standards writing clean and efficient code with description comments and naming conventions

Education

Continuing Education Full-Stack Web Development: Kansas University, Overland Park, Kansas (2020)
